Salicylate elimination diets in children: is food restriction supported by the evidence?

Richard F Heller, C Ann Heller and Jane Heller

Med J Aust 2013; 199 (7): 459

doi: 10.5694/mja13.10829

TO THE EDITOR: The two contributions by Gray and colleagues¹ and Loblay and colleagues² on the topic of salicylate intolerance illustrate that absence of evidence does not equate to evidence of absence.³ Neither paper quotes the admittedly sparse European peer-reviewed literature on the topic, including

Richard F Heller, Emeritus Professor¹

C Ann Heller, Retired Radiologist²

Jane Heller, Senior Lecturer³
