PEDIATRICS Vol. 68 No. 2 August 1981, pp. 302

Letters to the Editor

Fredrick J. Stare MD, PhD¹

¹ Department of Nutrition, Harvard University School of Public Health, 665 Huntington Ave, Boston, MA 02115

There is nothing in our paper referred to by Dr Campbell that indicates or implies that it is "the final word on the ineffectiveness of the **Feingold diet**." All we wrote was that "The reality is that we still have a great deal to learn about this condition (hyperkinesis) ... it appears now that **diet** plays at most, a very minor role." That doesn't sound to me like "the final word"!

Neither Harvard's Department of Nutrition nor the American Council on Science and Health is *my* institution, though I am active in both.
